

Pre-Algebra – Study Sheet for Test

Chapter 4 Section 5-6 – 7th Grade

Name: _____ Date: _____ Hour: _____

Instructions: Complete the following problems.

1. Describe the relationship between the data in the scatter plot.

- a. Positive linear
- b. Negative linear
- c. Nonlinear**
- d. No relationship**

2. Fill in the blanks.

The table shows the number of hours spent studying and the test scores for several students. An equation of the line of fit through (1, 62) and (9, 98) is $y = 4.5x + 57.5$. Interpret the slope and the y -intercept.

Hours, x	9	3	2	8	6	1	8	5	4	7
Test Score, y	98	85	70	92	79	62	88	85	80	96

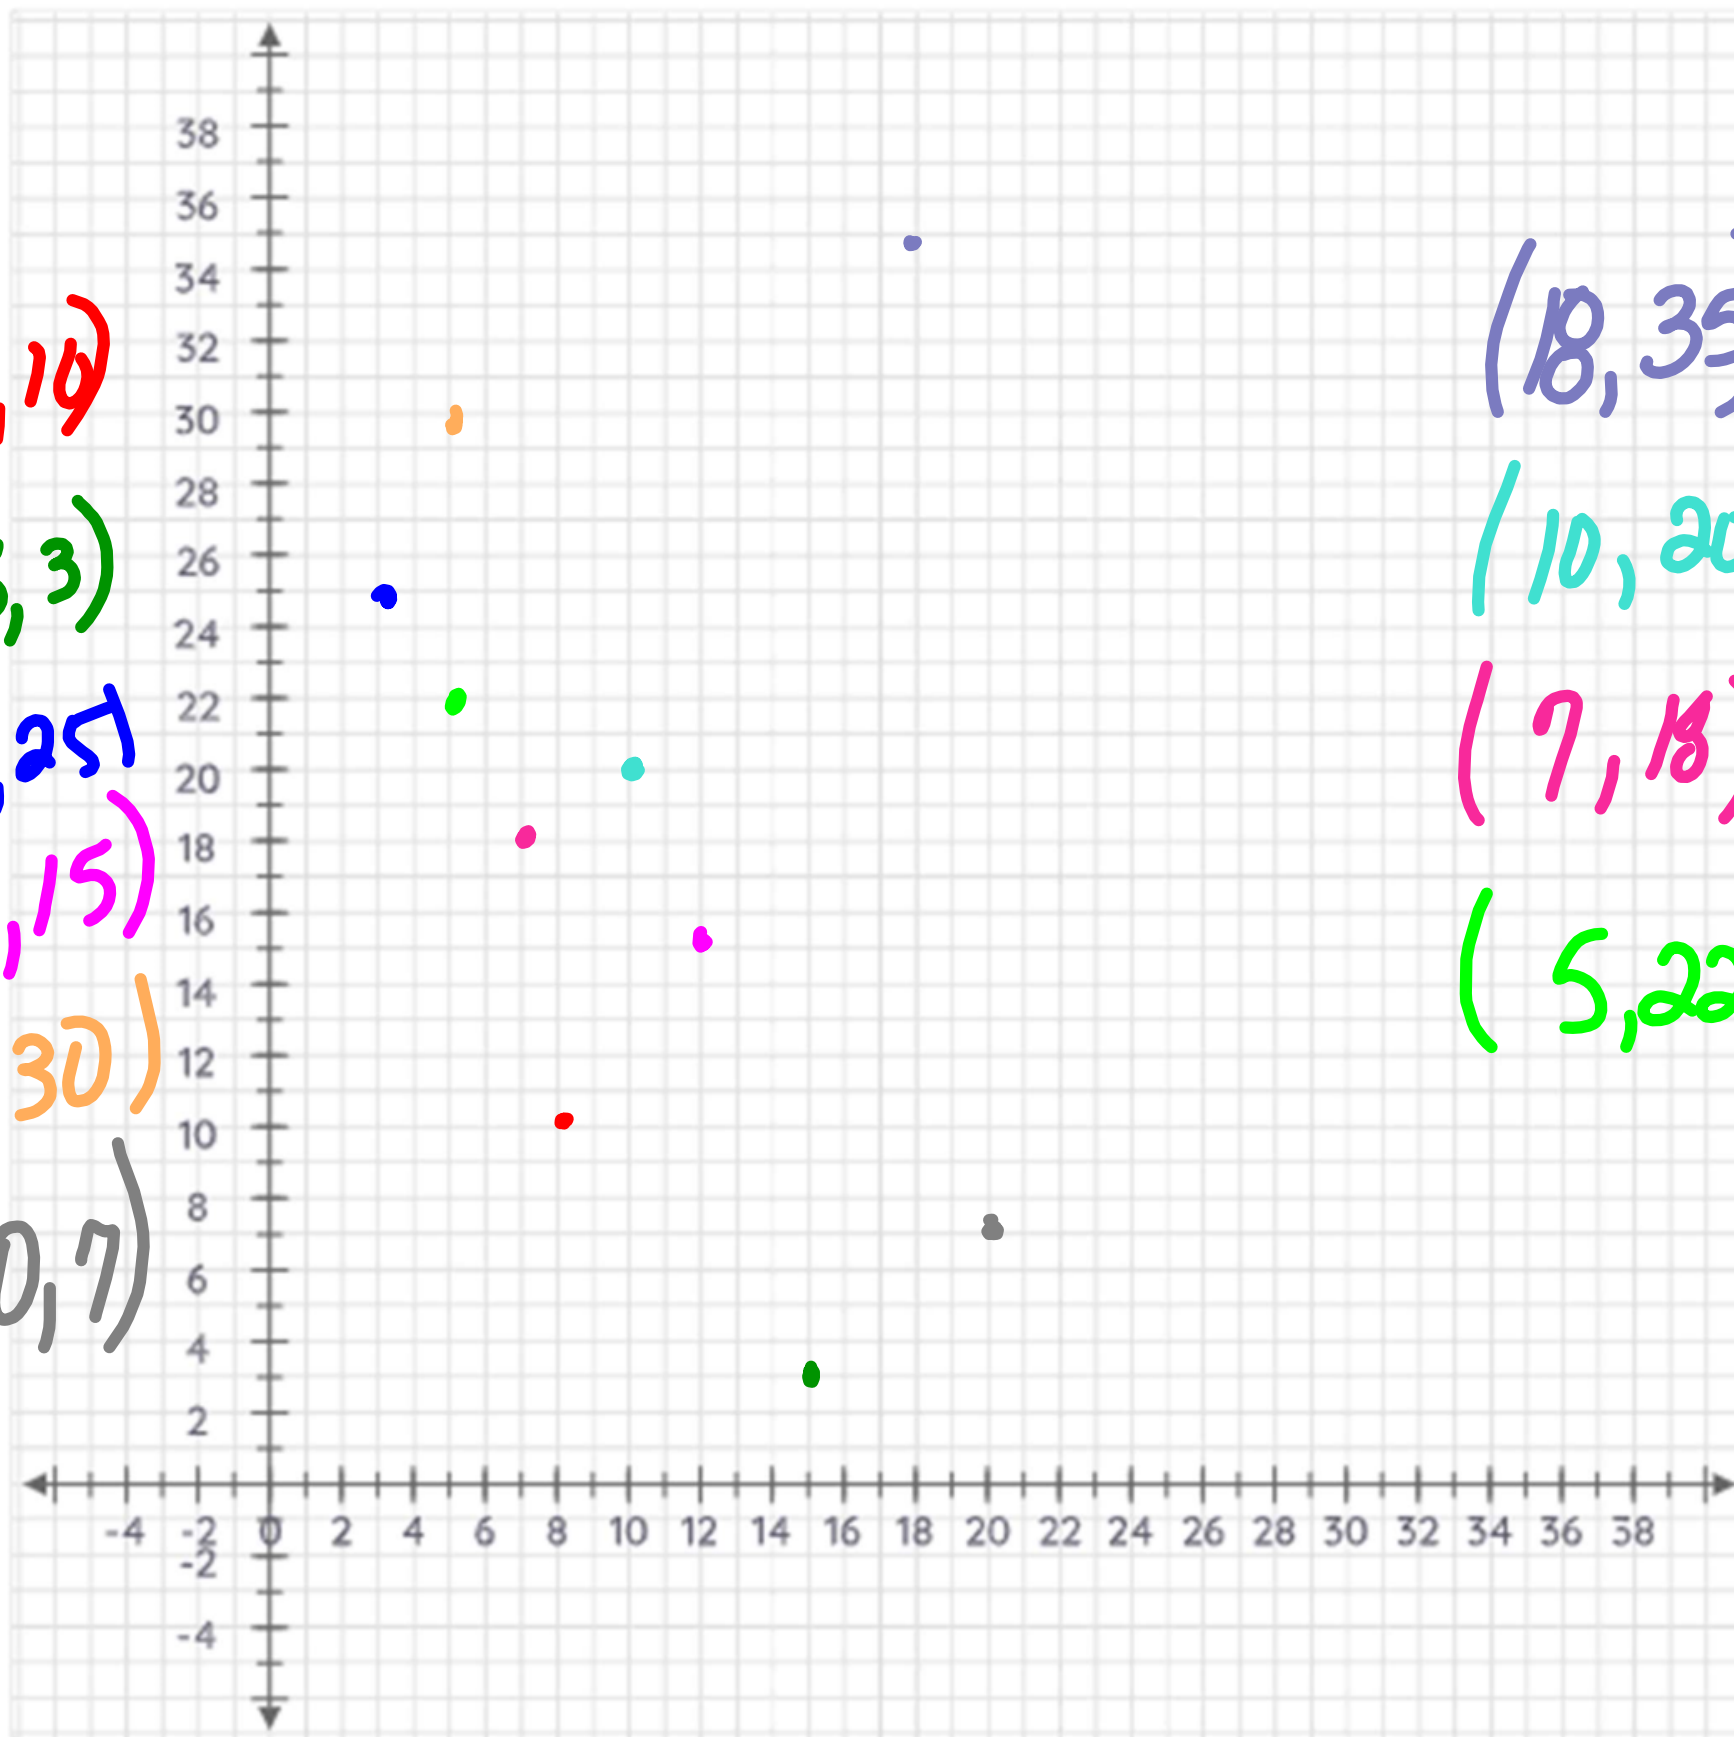

The slope is +4.5 and the y -intercept is +57.5. So, a student who studies 0 hours is expected to earn a 57.5 on the test, and the score increases by about 4.5 points per hour spent studying.

Chapter 4 Section 5-6 – 7th Grade

3. Make a scatter plot for the data.

x	8	15	20	3	12	5	18	10	7	5
y	10	3	7	25	15	30	35	20	18	22

Pre-Algebra – Study Sheet for Test

Chapter 4 Section 5-6 – 7th Grade

4. Complete the following.

Part A Draw a line of fit using (40, 40) and (10, 10).

x	35	5	30	40	40	30	40	15	10	15
y	30	0	30	45	35	35	40	15	10	20

$$m = \frac{10 - 40}{10 - 40} = \frac{1}{1} = 1$$

$$y - 10 = 1(x - 10)$$

$$y - 10 = x - 10$$

$$y = x$$

Part B An equation of the line of fit is $y = \underline{\quad\quad\quad}$.
